Being a PHILOSHOPER

Joining our team of PHILOSHOPERS puts you in the driving seat to make significant impact by engaging in innovative projects with large international clients, actively participating in decision-making processes that shape our future and put us on a growth trajectory.

As an active team player you'll enjoy a fulfilling career path with ample opportunities for professional development. While you'll start with manual testing as the core focus, there is scope to grow into automation as your experience and interests develop.

What You'll Do

- ✓ Collaborate with the delivery team to translate business requirements into comprehensive test plans and robust strategies.
- ✓ Execute and monitor manual functional and regression tests to verify that our solutions meet performance, usability, and technical standards.
- ✓ Identify, document, and drive the resolution of defects.
- ✓ Produce and maintain accurate test documentation and reporting while enhancing testing coverage and processes.
- ✓ Ensure solutions meet industry and legal standards and promote a culture of quality across the development lifecycle.

Skills we look for:

Qualifications

- Computer Science Degree
- 2-4 years of experience as a QA Engineer or similar role within a software company

Soft Skills

- Customer centric approach
- Initiative, drive & ambition - passion for success
- Analytical skills & problem-solving
- Organisational & time management
- Adaptability
- Self-driven team player
- Confident communication in English (written & oral)
- Exceptional attention to detail
- Openness to learning new tools and testing methods

Tech Skills

- Proficiency in software testing principles and methodologies (SDLC & Agile), software architecture and programming concepts
- Familiarity with transactional, high-volume systems
- Experience with:
 - CI/CD tools & scripting languages
 - Web & mobile testing
 - API testing, SQL and Linux environments
- Knowledge of IT security practices and digital commerce regulations

Our Tech-stack:

- Java (Maven), C#, .NET, PHP, JavaScript, HTML, CSS, HTTP, Python
- Angular & ionic framework, Bootstrap, GWT, WordPress
- GCP (AppEngine, BigQuery, Kubernetes, etc.)
- SQL and noSQL databases
- Jenkins
- Agile methodology: Kanban

Nice to Have

- Exposure to automated testing tools
- Experience with issue tracking tools, e.g. Jira
- Familiarity with version control and build tools such as Git and Maven

Who we are:

PHILOSHOPIC is a Cloud-native Software Solutions company, enabling Simple & Exciting Consumer Experiences. We innovate and commit to the success of business clients in the Retail & Financial Services industries internationally.
